## 5.1

## Decentralization &amp; blockchain

Our goal is to keep all the valuable assets earned by players in an environment which would be kept alive by the community. Players can freely trade them on the market later. Therefore, it is clear that our path is to build a blockchain game

With the benefit of blockchain and decentralization, players can now create some values while they are playing. These values can be exchanged like cryptocurrency. Nowadays, cryptocurrency has become more and more popular, which will help people earn money by playing game. And thanks to decentralization, we can make sure our product is tamper-proof.

The concept of Play to Earn provides you with many ways to earn cryptocurrency. Users are rewarded for the value they bring to the platform. Rewards can be earned by just playing. Users can also design and create assets for the platform and sell them on the market. Not an artist? You can make profits from trading rare items.

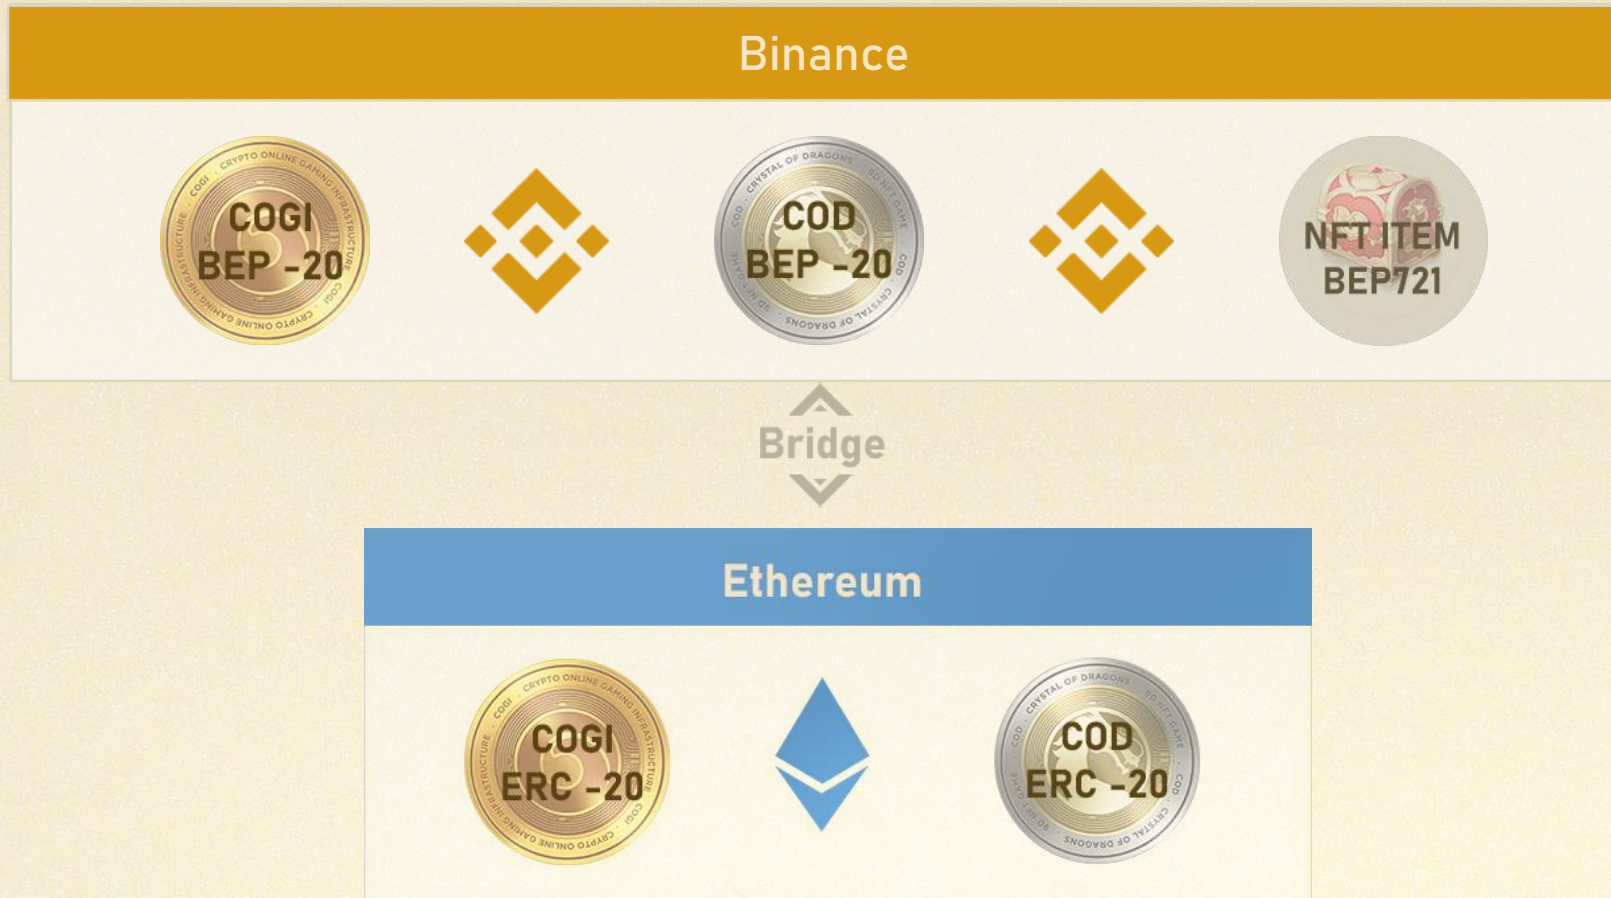

## 5.2

## Architectures

## Current model

Our team is currently trying to take advantage of the best BlockChain systems to provide a great gaming experience and maximize returns for investors. Specifically, COGI tokens are being developed based on the token standards of the Binance and Ethereum Blockchain, and NFTs will be issued on the Binance Smart Chain (BSC), which helps gamers spend as little as possible to own an NFT token.

## 5.2

## Architectures

## Future Model

To attract future Ethereum SideChain cash flows we will build a cross-chain platform for the game industry to connect with major eco-systems - layer 1 BlockChains as Solana, Polkadot, NEAR, Cosmos, Avax... At the same time, we also build a market system and wallet to support other game developers to develop games on the BlockChain platform quickly.

## 5.3

## Development roadmap

2021

- ◆ Building COGI Token and COD Token based on ERC-20 of Ethereum BlockChain.
- ◆ Implementing the first NFT - ERC721 for game MMO 9DNFT
- ◆ Building major features for a NFT marketplace.
- ◆ Deploying tokens to the best of current blockchain platform.

2022

- ◆ Building COGI cross-chain platform for gaming industry to connect with major eco-systems - layer 1.
- ◆ Building an exchange market for a variety of tokens from different games.
- ◆ Creating a dedicated wallet for gamer community.

2023

- ◆ Supporting and consulting solutions for NFT games of community.
- ◆ Aiding, consulting in ICO/IDO/IEO ... for NFT games.
- ◆ Providing aids and funds to NFT game studio.
- ◆ Supporting platform developer to quickly build game blockchain.

*The above-presented details in the roadmap are not final and subject to changes in the future in a way that is conducive and appropriate for the industry landscape, community demands, and long-term prospects of the project.*

## 6.1 Thank you!

We decided to bring this project to life during the time when Vietnam is struggling with the most severe outbreak of nCoV 19 it's ever had. With many sacrifices, helps, and cares within the community and people during this difficult time, it brightens up our eyes to more meaningful things in life, and somewhere between the loss and the separation, it shows us the most precious is our moments together on this Earth. The **9D NFT** project was created with the same ideology; the desire for everyone to have the opportunity to know one another regardless of which country we are, the chance to be able to exchange and learn so that we can better understand the cultures and beauties of each Regions. Who knows, when we finally met in real life, we were already dear friends.

For this project to proceed, We would like to extend gratitude to GIHOT Studio team, ever since June of 2019, they have been accumulating time and dedication for the project, building and providing **9D NFT** with a great platform with more than 5 languages and 6 countries. Gratitude to GOSU team for consulting and accompanying us during the whole process, your experience, consulting, and guidance always lead us on the right way in the most difficult times. Thank you to Game6 and GAMO team for choosing to promote and spread the **9D NFT** project to everyone's attention.

With our sincerity and desire to make give back to the Community, the **9D NFT** team have agreed to repurpose 5% of Adviser & Team's Token allocation (~9,520,000 COGI Tokens) into a Help Fund for nCoV19 patients and always remember September 9, a day chosen by the **9D NFT** Community, as a memorial day for the selfless sacrifices of medical staffs, volunteers and the pain of loss caused by nCoV all over the world in general and in SEA region in particular.

Last but not least, thank you very much for your patience in reaching this far into the project's White Paper, which is a great encouragement to **9D NFT** team. Although we want to create the best and most perfect project for the Community with 2 main criteria "**Play 4 Fun**" and "**Play 2 Earn**", there are bound to be shortcomings and mistakes. We hope with time and dedication we will come a bit closer to perfection. We're hoping for everyone's understandings and forgiveness.

Any suggestions and feedback, please do not hesitate to contact our team immediately!
